

EMPOWERING OUR HEALTHCARE HEROES

NURSES AND THE POWER OF EXOSKELETONS

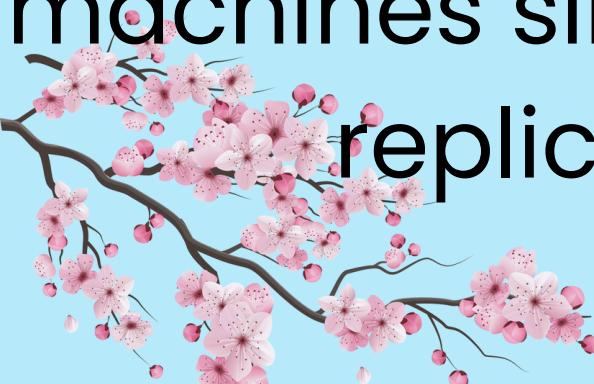

NURSES ARE THE HEARTBEAT OF HEALTHCARE

Nurses are the non-replaceable part by AI/Robots in the future.

Nurses adapt to emotional needs that machines simply can't replicate

Every Human Craves Love and Care in Tough Times

THE PHYSICAL TOLL OF NURSING

Lifting patients, long hours on feet, and repetitive tasks lead to high injury rates—back pain affects up to 80% of nurses, causing burnout and shortages

Nursing assistants and nurses, on the front line

The significant toll that MSDs place on healthcare workers (according to the European Agency for Safety and Health at Work)

40%

suffer from health problems related to their work

20%

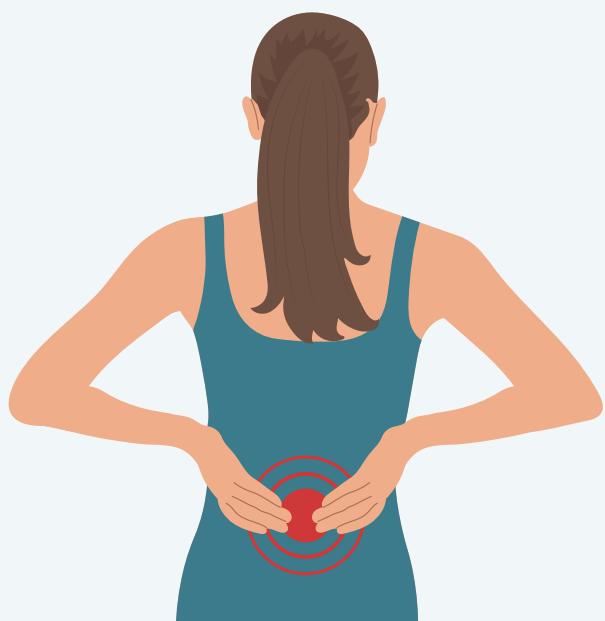

will leave their job due to injury on the job

70%

of work stoppages are due to MSDs

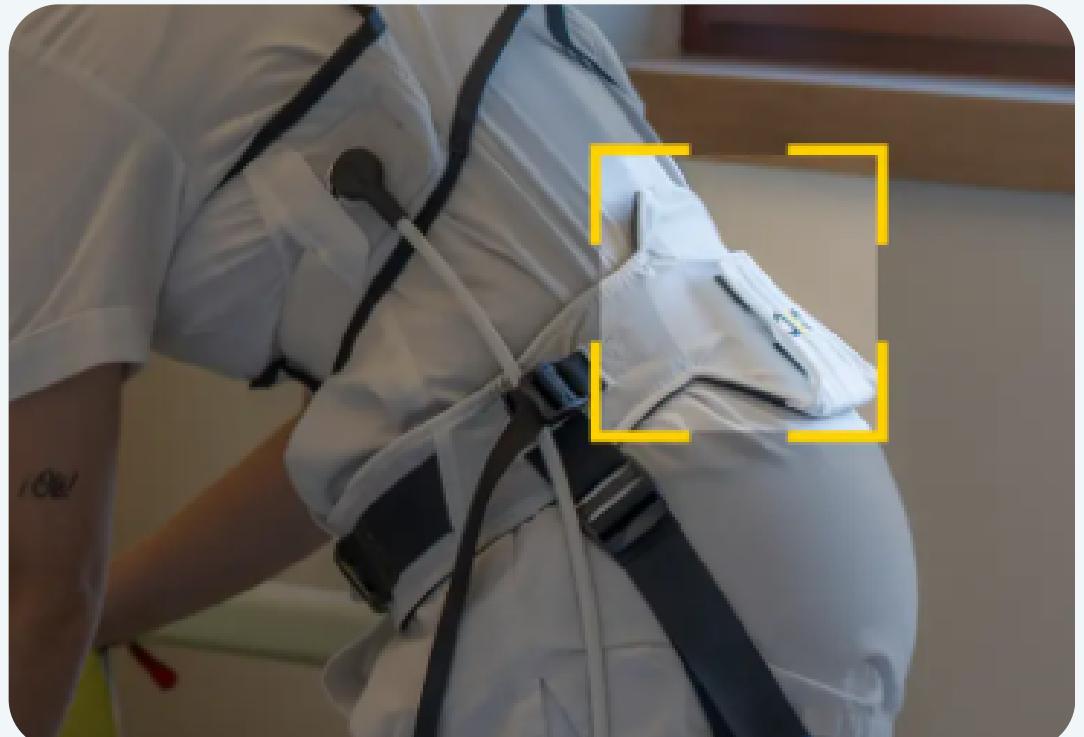

<https://www.hapo.eu/en/content/22-exoskeleton-for-caregivers-and-nurses>

Musculoskeletal disorders are a top issue, with many nurses leaving the profession early

THE SOLUTION: EXOSKELETONS FOR NURSES

Wearable exoskeletons like the Hapo CS (designed for female physiques) or German Bionic's Apogee+ provide lumbar support, reducing strain by up to 40% during lifts and transfers. They help nurses work safer and longer

SUPPORT NURSES TODAY—ADVOCATE FOR EXOSKELETONS!

Let's **invest** in tools
that protect our
irreplaceable
caregivers.
