

All Hands – January'26

FY 2026

A Breakout Year for Innovation, Creativity, and Leadership

🚀 Quarterly Engineering Hackathon -Kickoff

Dates: Feb 3 – Feb 5, 2026 (3 Days)

Location: MedGenome Bangalore Office + Remote

👥 Who Can Join?

All Engineering team members

🎯 Objective:

- Build **AI-driven features** to enhance intelligence, automation & UX
- Deliver **high-impact, long-pending product features**
- Foster **innovation, rapid prototyping & cross-team collaboration**

🔧 What to Expect :

- Freedom to **innovate & experiment**
- Strong **cross-team collaboration**
- **Demo day** to showcase outcomes
- **Recognition** for impactful ideas & implementations

Coursera Access

ClairLabs has subscribed to Coursera for Teams! All employees now have free access to thousands of courses, specializations, and guided projects.

Take advantage of this opportunity:

- Dedicate 15-20 hours/month to learning.
- Submit your monthly learning plan to your manager.
- Complete courses and certifications that align with ClairLabs' vision.
- Use Cloud Playground Labs for hands-on practice.

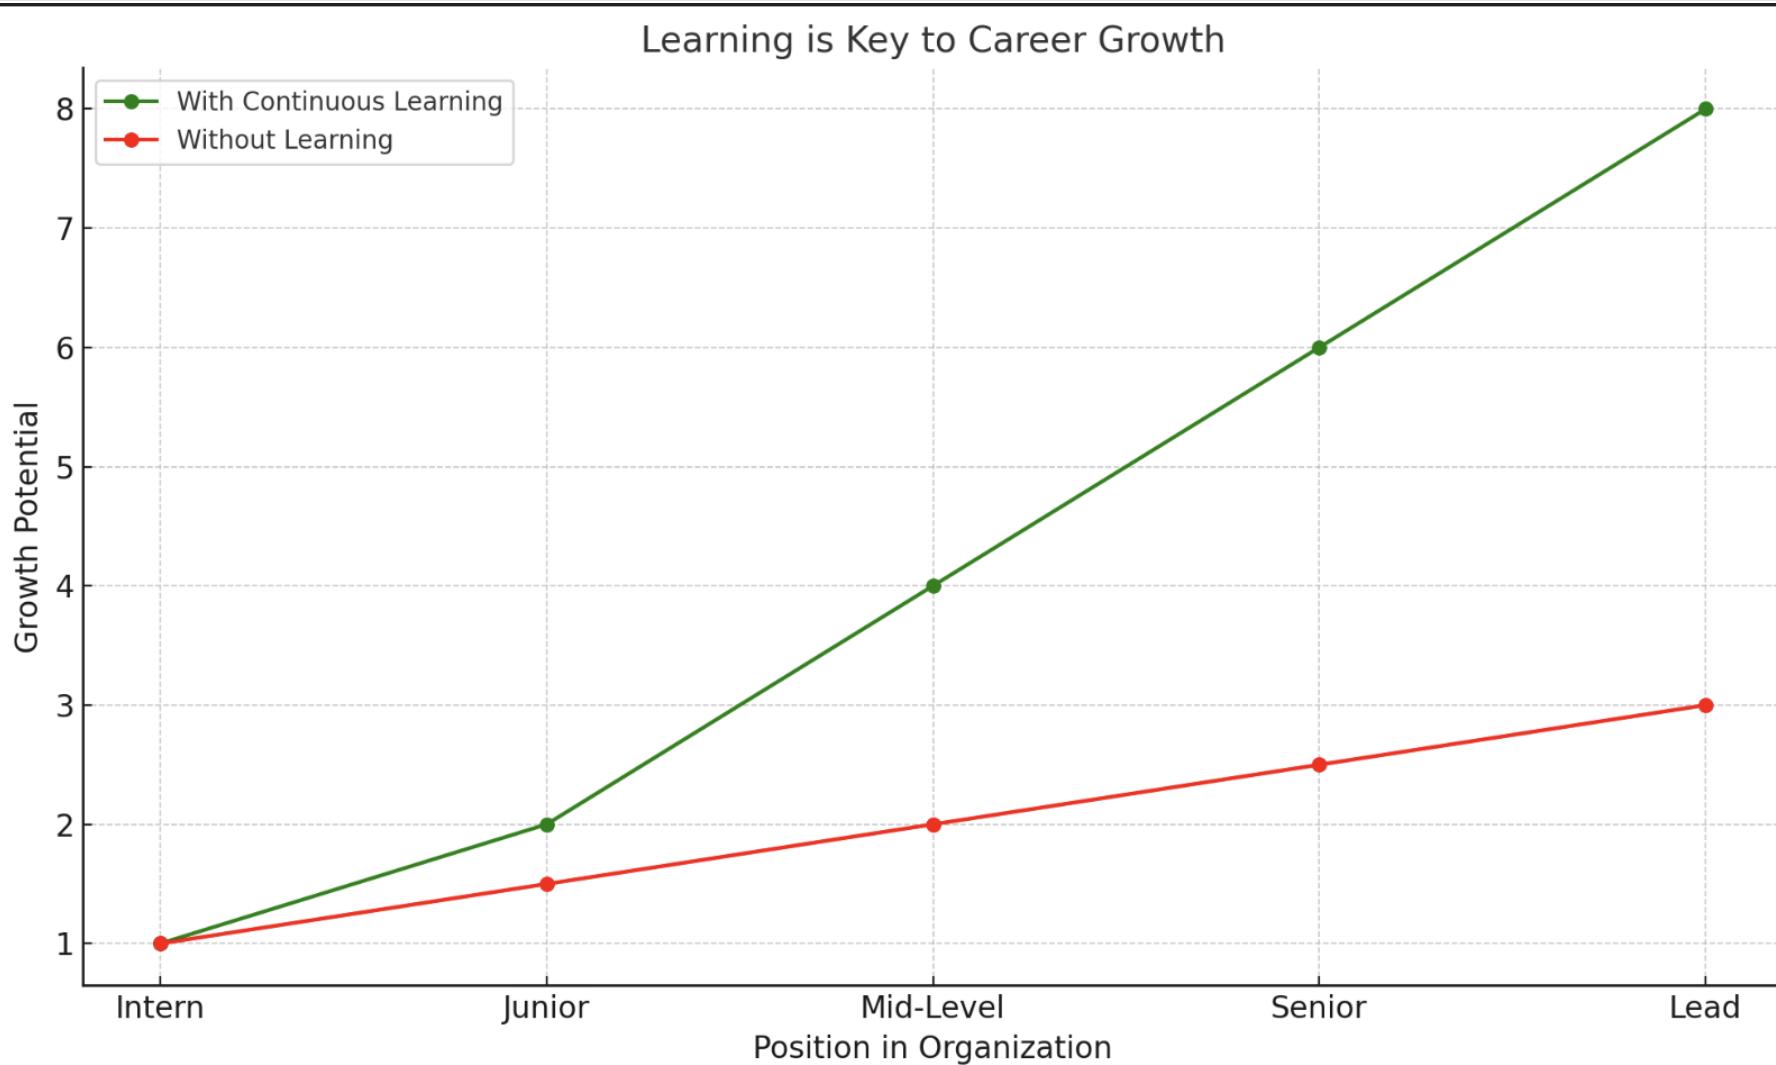

Eligibility & Support:

- All full-time and contractor employees.
- Company provides laptops, Coursera access, and certification reimbursement (post-approval).

Let's grow together—learn, upskill, and excel! 

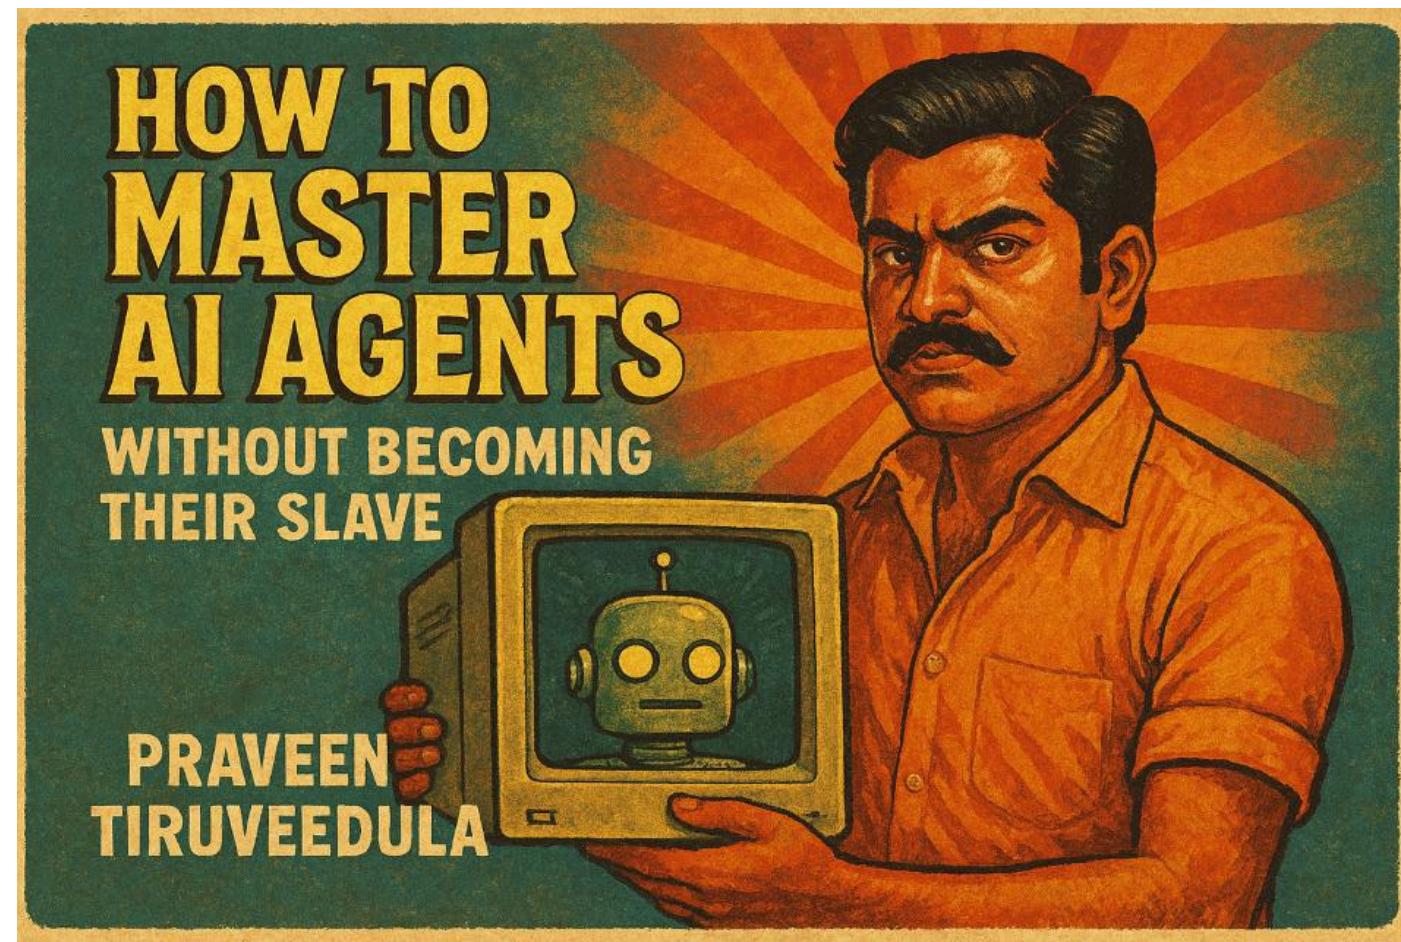

Continuous Learning

ClairLabs Learning Program

Name	Certifications Completed	Certifications Planned/In Progress
Amit Parhar	AWS – AI Fundamentals and the cloud	
Tejaswine Kantu		AI for Medical Diagnosis
Vijaya Lakshmi	Google AI essentials	Start Writing Prompts like a Pro
Raja K		Generative AI & Data Science with Real World Data in Pharma
Divya Jeevan Rao	Databricks Accredited Generative AI Fundamentals & AWS Cloud Practitioner Essentials & Introduction to Genomic Technologies	-
Tauseef Shaikh	Serverless Architectures on AWS	AWS Certification
Peram Chakravarthi	Professional in Human Resources & Employer Branding to Attract Talent	
Praveen Tiruveedula	Introduction to Genomic Technologies	
Guru Raja Rao M	Genomics & Bioinformatics (Data / ML Engineering focus) & Healthcare Data & Informatics (Backend / Data Engineering focus)	

OnPrem & Cloud Project update

Varminer

- UAT sign off-18th Dec'25
 - Released-22nd, Dec'25
- Key Features:**
- Dashboard revamp (AAS + VARTK)
 - CNV filters (common + default)
 - NMID for additional tables
 - Test methodology in VCF
 - Pseudogene statement addition
 - Modified master filter (with/without OMIM)
 - Mito recommendation bullet points
 - CNV variant description automation
 - Auto-add benign/likely benign variants
 - Fetus sample secondary checklist fix
 - Auto ACMG classification rename
 - PGX indel variants visibility issue
- © Copyright ClairLabs. All rights reserved.

Oncominer

- UAT Sign off-3rd Dec'25
 - Planned Release- 3rd wk, Jan'26
- Key Features:**
- MSI rejection dropdown
 - Template updates
 - HRD status logic
 - AZ-PH template mapping
 - MSI graphics & disclaimer update
 - Added disclaimers or methodology
 - Dynamic TMB enhancement
 - RareCan customization
 - TMB disclaimer
 - Gene count update
 - MET gene addition
 - Fusion button addition
 - Heme designation update
 - PMID enablement
 - Treatment detail's view
 - Fusion filter enhancements
 - Heme hotspot & 361-gene panel addition

MySQL Upgrade

- MySQL upgrade-3rd WK, Feb'26 (Tentative)
- Key Features:**
- **Enterprise Security:** TDE, Firewall, Audit, External Authentication, Oracle Key Vault.
 - **Backups:** Hot + Incremental backups using MySQL Enterprise Backup.
 - Better performance & scalability
 - **High Availability:** ClusterSet, Enhanced InnoDB Cluster, automatic failover.
 - **Monitoring:** Enterprise Monitor, Query Analyzer.
 - **Support:** 24x7 Oracle support with early security patches.
 - **Compliance:** PCI, HIPAA, GDPR-ready features.

LinC V1

- MVP Release-1st WK, Feb'26 (Tentative)
- Key Features:**
- Patient & Sample Management
 - Clinical Synopsis
 - Carrier & trio
 - CNV Analysis & Reporting
 - Germline Analysis & Reporting
 - IGV Viewer, Ideogram
 - IAM: Account Management, User Management, RBAC
 - Auto ACMG
 - Oncology

LinC V2

- UAT-4th WK, Dec'25
 - MVP Release-3rd WK, Jan'26
- Key Features:**
- Patient & Sample Management
 - Clinical Synopsis
 - Bulk Import
 - QC Stats- HRD,HRR
 - Variant interpretation: CNV, Fusion, Coverage, MH integration, IGV viewer etc.
 - Diagnostic Report: report Tab, All reports page with AI Agents etc.
 - IAM: Account management Tenant Management, User Management, Role Management

The Perform or Perish Mindset

What helps us thrive

- Proactive ownership
- Bias for innovation
- Speed + quality
- Lifelong learning
- Customer obsession

What Won't Survive:

- Mediocrity
- Hand-holding
- Overthinking without output
- Lack of curiosity
- 'Not my job' mentality

The culture we are building

- Extreme clarity + extreme trust
- High accountability
- Transparent metrics
- Customer-first, science-first mindset

A large, abstract graphic element on the left side of the slide features two overlapping circles. The outer circle is white with a thin teal border, and the inner circle is teal with a white border. They overlap in the center, creating a shape reminiscent of a stylized DNA double helix or a molecular structure. The background of the slide has a subtle, faint teal grid pattern.

Thank You

Let's continue building ClairLabs together
